

TO THOSE WHO TAKE TO THE FIELDS ON MAY 1ST FOR SOCIALISM AGAINST WAR, EXPLOITATION, RACISM AND FASCISM!

1

Enough of our feeble protests against the return of the cruel wheel of capitalist barbarism! May 1st is the "Day of Unity, Struggle, and Solidarity," created by the working class and laborers through sacrifices and written in bold letters in the history of class struggles! Acting with the awareness of what we are experiencing during the preparations of the imperialist-capitalist barbarism to re-share the world with blood; to reflect the fighting and solidarity aspects of May 1st in the fields and to shout more strongly that we do not want to experience a third World War and to form fighting alliances; it has become a necessity for workers and laborers, women and youth, LGBTIs+. With the understanding that the Russian imperialists' invasion of Ukraine and the American imperialism and leading imperialist states of Europe, which provide weapons and logistical "support" to Ukraine by calculating how they will benefit from this war, are negotiating how much of the underground wealth resources will come under whose control. As long as this negotiation continues, it is not possible for the war to end. The genocidal actions carried out by the fascist Zionist State of Israel against the Palestinian nation do not cease. It is clear that the supporters of the genocide in Gaza are the US and European imperialist states. In the dirty war carried out in Yemen by the fascist, reactionary Saudi Arabian regime, with the organization and active participation of the US and British imperialist states, and the number of people dying of starvation exceeds tens of thousands, while tens of thousands of people lost their lives in the war waged for the usurpation of the gold mine in Sudan, 12 million people were displaced. Russia, the Republic of Turkey, the US, and Israel, who gave the administration of the destroyed Syria to the reactionary fascist HTS (Hayat Tahrir al-Sham) terrorist organization, are responsible for the planned dirty games for the massacres against the Alevis and other minority communities and the usurpation of the gains of the Kurdish nation. The imperialist-capitalist bourgeoisie and their local lackeys, who clash with each other to re-share every corner of the world, do not make efforts for the good transformation of this picture. This picture does not only make the lives of the people in the mentioned countries unbearable; at the same time, it is constantly worsening the lives of the people in Europe, America, Russia, and China, where we live. The fascistization led by US President Donald Trump is spreading the support of racist-fascist "opposition" parties and the establishment of governments. They are making it increasingly difficult and even preventing the exercise of democratic rights and freedoms.

TO THOSE WHO TAKE TO THE FIELDS ON MAY 1ST FOR SOCIALISM AGAINST WAR, EXPLOITATION, RACISM AND FASCISM!

2

They forcibly prevent people whose countries have been burned and destroyed due to the wars they provoke or organize from seeking a safer place, and they prepare the ground for the development and strengthening of racist and fascist movements by using the excuse of these people settling in their countries. . The monopolist bourgeoisie, which adds more profit to its own profits despite the crisis, is making false propaganda that the reason for the decline in the living standards of workers and laborers is these people who had to immigrate; they want to prevent the oppressed, exploited, scorned, those who suffer from income and gender inequality from getting closer to each other, uniting, and fighting together. This desire of the bourgeoisie must be thwarted. The wave from below is constantly surging against the wars, occupations, genocides, massacres of women and children, and the biological destruction of nature caused by the international monopolist bourgeoisie. Mass protest demonstrations and boycotts are spreading. Mass demonstrations against imperialist wars, demonstrations against violence against women, which women attend more crowded and organized every year on March 8th, solidarity actions of university students with the Palestinian nation against the genocide operations carried out by Israeli Zionism in the Middle East, especially in Gaza, demonstrations of millions who took to the streets in Turkey against the practices of the fascist AKP-MHP government, and the protests of hundreds of thousands of people in 50 states of the US in recent days with the demand for democracy against the Donald Trump administration; are promising for changing the current black picture. We must act with the awareness that the task of developing organized and united struggles of the wave from below against the capitalist system is updated more effectively and we must show more intense effort and enthusiasm in participation so that this year's May 1st demonstrations will be a trigger in fulfilling our duties. To celebrate "May 1st Day of Unity, Struggle and Solidarity"; we call all the oppressed, exploited, scorned, those who experience inequalities, the homeless and unemployed, the impoverished, the unappreciated and exploited laborers to the streets!

- **LONG LIVE MAY 1ST!**
- **DOWN WITH CAPITALISM!**
- **LONG LIVE SOCIALISM!**
